

SlimLine

Technology for people

Versatile with space saving design.

Highest level of comfort for your patients.

SlimLine

Technology for people

The SlimLine therapy chair impresses with its modern, space-saving design and its first-class features, which are perfectly tailored to the requirements of oncology treatments and units.

The modern design with advanced technology creates a pleasant and relaxing atmosphere even in smaller spaces.

QUALITY
MADE IN
GERMANY

One particularly user-friendly feature is the **easy entry and exit** from the front. Thanks to the **innovative design** with 90° inclination of the leg section and the existing seat section inclination, access to the SlimLine is as easy as sitting on a chair. The **innovative armrest concept** also guarantees stability when getting in and out of the chair.

For increased comfort, SlimLine can be upgraded with an ergonomically shaped and easily adjustable neck roll.

In an emergency, the SlimLine can be adjusted to a head-down position at the touch of a button. The stable base frame provides the necessary stability for this, despite taking up a small area.

Give your surroundings more colour

The **high-quality design** of the therapy chair with your choice of upholstery colour makes it an ideal addition to any hospital, clinic or doctor's office.

A **wide range of artificial leather colour** will also help you create a pleasant and relaxing atmosphere in your environment.

The **pleasant feel** and **excellent material properties** ensure long-lasting, easy-care and comfortable use.

Flexible adjustment

SlimLine enables precise adjustment to the patient's individual needs thanks to the **infinitely variable electric adjustment of the backrest, seat and leg sections**.

The leg section moves synchronously with the seat section and the backrest can be adjusted separately to the desired position using a user-friendly and clearly understandable hand switch.

Easy handling

The SlimLine has an exceptionally comfortable upholstery that is removable and easy to clean. Patients benefit from a **very comfortable seating position**, especially during longer sessions.

The **hand switch** is easily accessible to the patient at all times thanks to a practical holder on the armrest.

The **surfaces of the chair** are hard-wearing having minimal seams, which makes cleaning easier and reduces wear and tear.

The stable armrests can be lowered into various positions at the touch of a button, allowing them to be conveniently adjusted for the patient's comfort.

Technical data

Dimensions

Seat width	54 cm
Total width, incl. armrests	80 cm
Height (fix, with castors, standard)	57,5 cm
Height (fix, with feet, optional)	54 cm
